# READY TO QUIT?
## Evaluation Questionnaire

### FOR PATIENTS:
Put this somewhere in plain sight where you can look at it every day. If you’ve decided to quit smoking, it will help you stay focused on your commitment. If you haven’t decided yet, seeing how quitting could make a difference in your life may give you some food for thought.

### FOR HEALTHCARE PROFESSIONALS:
Answers to the following questions can help to assess a patient’s readiness to quit. This tool can be copied for a patient’s chart or scanned into his or her electronic medical record.

## 1. WHAT KIND OF SMOKER ARE YOU? (Check one)

- Social smoker (# of cigarettes per outing?)
- Daily smoker (# of cigarettes per day?)
- Heavy smoker (1+ pack per day)

## 2. WHAT ARE YOUR THOUGHTS ABOUT SMOKING? WHAT DO YOU LIKE AND DISLIKE?

NicoDerm® CQ® and Nicorette® products give your body a therapeutic dose of nicotine that can help increase your chances of quitting. As your body adjusts, you lower the amount of nicotine until you don’t need it anymore. When you quit smoking, your body will still want nicotine. The program is designed to help you quit slowly by providing nicotine in a controlled manner. Don’t feel like you need to be a hero and “power through” cravings—the longer you wait, the harder it will be not to light up. It’s better in the long run if you use NicoDerm® CQ® and Nicorette® consistently to help relieve your cravings. Over time, you’ll find many of your cravings will go away. Just be patient.
